

“everyone - everywhere”

music-video-core made by Landjugend, 3:55 min, 2007

about Landjugend:

about the video:

There is something growing behind the modern day corporate life, something weird.

break-cutted-mashup-video-core: The video focuses on the frontlines of modern day life, on work and leisure, art and powerpoint. We used dozens of animation tools, with hundreds of bugs and failures. But we treated these bugs as features to strip modern technology naked.

This music clip was made in cooperation with jason forrest and his label **cock rock disco**. it features music from 15 different artists:

Food For Animals • About • Duran Duran Duran
Dev/Null • Next Life • Stunt Rock • Slepcy
